

RELEASE 250

SHAKER PAD LUBRICANT

LUBRICANT
PRODUCTS

RELEASE 250 is a clear non-toxic silicone/petrolatum spray lubricant designed to lubricate and protect rubber tree shaker slings. This compound deeply penetrates into rubber and then gels and thickens to provide a slippery barrier for reduced friction on the rubber to rubber surface. It prevents heat build-up during the tree shaking operation and prevents bark damage to the tree. This clean, non-toxic formula can be used with confidence to provide solutions to a multitude of lubrication problems associated with valves, pistons, rings, seals, slides, tracks, hinges, gears, etc.

FEATURES & BENEFITS:

- No harsh solvent.**
- Buffers-** Safe on trees.
- Silicone blend-** Increased lubrication.

APPLICATIONS:

This compound is designed to prolong the life of shaker slings, and protect the bark on the tree.

DIRECTIONS:

Point trigger toward target area and spray a thin film into the working surface of the shaker sling. As the lubricants impregnate the surface of the rubber, a shiny wet appearance will be maintained. Re-apply approximately once per hour or as conditions warrant. When new shaker slings are installed it is recommended to pre-soak the working surface of the rubber with **RELEASE 250** two or three times at 1-hour intervals prior to installation.

CUSTOMERS WHO USED THIS PRODUCT ALSO USED:

FORMULATION:

Silicones, special lubrication compounds, surfactants.

TARGET ACCOUNTS:

Any account where the use of shaker slings is necessary.

SPECIAL CAUTIONS:

Pre-test before using on plastics.

PACKAGING AVAILABILITY

Aerosol
