PRUNING SEAL

PREMIUM PRUNING AND GRAFTING SEALER

SELLO PARA LOS ABOLES

- **SMOOTHER SPRAY FOR EASIER COATING OF TREES**
- **BETTER COVERAGE**
- **BIGGER CAN**
- **LONGER LASTING**

CAUTION: CONTENTS UNDER PRESSURE. VAPOR MAY BE HARMFUL. READ CAUTIONS ON BACK PANEL BEFORE USING.

KEEP OUT OF REACH OF CHILDREN

PRODUCT #1099

NET WEIGHT: 18 OZ

911 PRUNING SEAL

Proper sealing of a pruned or grafted tree is vital to its longevity. Failure to achieve a complete and proper seal greatly increases the likelihood of infection from insects. In addition environmental factors such as weather and pollution rapidly accelerate decay. All of these factors can lead to premature death. Sunrise's 911 Pruning Seal was designed specifically to eliminate the problems associated with tree wounds.

DIRECTIONS

1. SHAKE CAN for 1 minute to thoroughly mix 911 Pruning Seal.
2. Spray intended tree wound liberally from a distance of 12-18 inches away. Use short, steady and even strokes while spraying. Best applied when temperature is between 70° - 90° F.
3. To clean spray nozzle for future use, turn can upside down and press spray nozzle for 2 seconds.

Tips - If clogging occurs, rotate spray nozzle 1/4 turn. If clogging continues, remove nozzle and clean with solvent. Gently replace spray nozzle with a twisting motion.

TO REORDER CALL US AT 800.648.1153

SUGGESTED USES:

- **Pruning and Grafting of Trees**
- **Sealant for Plastics, Metals and Wood**
