

AB-73

ALUMINUM CLEANER & BRIGHTENER

ACID-BASED
CLEANERS

SUNRISE' AB-73 is designed for the removal of anodoc and chromate coatings on aluminum. Provides incredible results for removing of heavy duty corrosion and mineral deposits as well. Easily neutralized for safe disposal.

PACKAGING AVAILABILITY

Bulk liquid:
5g, 15g, 30g and 55g drums

PART #2015

QR CODE:

FEATURES & BENEFITS

- **Acid blend**- Attacks both anodoc and chromate.
- **Low fuming**- Easier to work with.
- **Complex formulation** - Corrosion inhibitors, wetting agents, special foaming agents

APPLICATIONS

This product is ideal for any and all aluminum surfaces. It is safe on painted and lettered surfaces.

DIRECTIONS

For cleaning trucks and aluminum vans one part **AB-73** should be diluted with twenty parts of water. More soiled surfaces may require stronger dilution. The solution may be either brushed or sprayed on and allowed to dwell until a foam blanket occurs. Rinse with water and reapply if necessary. For mirror finish aluminum test at 1:50 and increase strength gradually.

TARGET ACCOUNTS

Utility, Taxi, Bus, Truck, Machine Shops, Outdoor Advertising Companies, metal fabricators.

SPECIAL CAUTIONS

Do not use on glass surfaces. This product is NOT designed to shine aluminum. Test inconspicuous place before using. Use caution appropriate to strong acidic liquid. **Protective equipment required: goggles, gloves. Respirator required when using in enclosed areas.**

CUSTOMERS WHO USED THIS PRODUCT ALSO USED:

- **Tomahawk** - Phosphoric Fleet Washing Compound
- **Trail Blazer** - Inorganic, low pH acid for a safe replacement to heavy duty acids
- **Counter Act** - Powder compound for neutralizing waste water and run off
